January 14, 2020

Dear Fellow Bethpage Homeowners near Monitoring Well 116-5 on North Herman Avenue

Re: Monitoring Well Monthly Sampling

Northrop Grumman's contractors, hired to support our routine groundwater remediation and monitoring program, will be working on our monitoring well on Thursday, January 16, 2020. The well hatch is located in the street in front of 150 North Herman Avenue on the northbound lane of North Herman Avenue near William Street.

We respectfully request that automobiles park **at least 20 feet away** from the hatch to provide sufficient room for our project team to conduct their work safely. During the work, you will see a support truck and the staff working in the street. We will set up traffic control signs according to our standard traffic control plan. Our team will sample the monitoring well using a generator and other sampling equipment. It will require less than one-half day to complete the sampling.

You should expect to see our team working in this area on a monthly basis and we will update you on our future work schedule. You have our continued commitment to notify you in advance of our collection schedule so that we can collect what we need with the least amount of inconvenience to you and your family. I am happy to let you know when we are finished if you call me and provide your phone or email address.

Northrop Grumman continues to work closely with the NYSDEC, the U.S. Navy and other federal, state, and local government regulatory authorities, to address environmental conditions in the area. We remain committed to pursuing scientifically sound, targeted and effective remedial approaches that protect the health and well-being of the community and avoid unnecessary disruption. For project information, please visit www.northropgrumman.com/bethpage

If you have further questions, please contact me at (516) 754-2645 or via email at dianne.baumert-moyik@ngc.com.

Sincerely,

Dianne Baumert-Moyik
